Active Learning ideas for the Classroom

	V	A	R	K
FLIPPED CLASSROOM	*Empowering student-led learning by encouraging students to engage with instructional content outside of class, allowing in-class time for active learning and discussions. Try the following classroom activities:*			
	design an infographic, create a diagram	discussion, presentations, think-pair-share activities, debate a topic	write introductory article, create mind map, list main points	role-play a situation, apply what they have learned to a case study, create and/or complete a quiz or game, solve a problem
PEER TEACHING	*Encouraging collaboration and knowledge sharing. Preparing the material clarifies student understanding and they can refine their knowledge based on feedback and contributions from peers. Students could present their knowledge in the following ways:*			
	diagrams, drawings, infographics, posters	oral presentations, discussions	written summaries, essays, written how-tos	demonstrations
ASSESSMENT THROUGH APPLICATION	*Evaluating understanding through action. Design assessments that require students to apply their knowledge. Try the following assessment ideas:*			
	creating a visual presentation	present aurally, participate in a debate	write a critique	solve a problem, demonstrate a skill, explain the application of a theory
